

VEO THE TASK CHAIR

Design: Matthias Dohm

Veio plays with different colours to reveal itself in all its glory. The ergonomically sophisticated swivel chair has intelligent functions that respond to the wishes of the sitter. Versatile variants satisfy personal preferences, ranging from the upholstered plastic back to the mesh available in four colours.

- Quick adjustment optimal to different weights and body sizes.
- Dynamic sitting improves the oxygen supply to the muscles.
- Upright sitting without curvature of the back.
- A choice of two backrest concepts: mesh or upholstery to meet your particular requirements and to help maintain your health.

Klöber Veo ergonomics.

Back. 6 cm height adjustment. For users of different heights. The S-shaped curvature also supports the shoulder area.

Back variants. Upholstered plastic shell or double-layer mesh for optimum support of the spine. The 3D-mesh is available in four colours: black, grey, silver and bordeaux.

4F Arm Supports. Four functions: heightadjustment by 11 cm with horizontal forward movement of 2.5 (+3) cm. Arm supports can be adjusted to each side by 5 cm and by 30° to right and left. In polished aluminium, aluminium-coloured or black. Optionally available with leather finish.

MF Arm Supports. Multifunctional: height-adjustment by 11.5 cm with horizontal forward movement of 8 cm. Arm supports can be adjusted to each side by 5 (+3) cm and by 30° to right and left. Setting can be locked in the respective position. In polished aluminium, aluminium-coloured or black.

3D Arm Supports. Height-adjustment by 10 cm, Arm Supports can be adjusted to each side by 5 cm and by 30° to right and left. Optionally available with leather finish.

Lumbar support, optional for models with upholstered backrest, depth adjustable by 2 cm. Provides relief for lower back.

Point-synchronised mechanism. Seat/backrest tilt ratio 1:4, moves dynamically with the body of the user. Prevents the damaging effects of a rigid body posture. Can also be locked into position.

Seat angle. Tilt of -3°. Helps maintain the natural S-shape curvature of the spine and prevents postural damage.

Sliding seat, optional. Seat depth adjustable by 5 cm towards the front. To suit individual leg lengths. Prevents the front seat edge from pressing into the thighs.

Patented adjustment of the counter-pressure of the backrest to individual body weight: from 45 to 125 kg in a matter of seconds thanks to user-friendly quick-set adjustment.

Z-armrests. Adjustable by 10 cm in height and about 2.5 cm in depth. Optionally available with leather finish.

Klöber Veo product overview.
